

Decor film - Technical product sheet

Product description:	Melamine resin impregnated décor paper for coating wood material panels using an additional overlay film
Application:	Coating of wood materials on short-cycle presses as per technical specifications To meet customer requirements, the décor film is covered with a highly abrasion-resistant overlay in a single process, which means various different abrasion classes can be achieved.
Base paper grammage:	50 - 90 g/m ²
Dimensions:	Widths up to 2650 mm Sheet length up to 6000 mm max. Roll length up to 2000 m continuous length
Supplied as:	Sheet goods Rolled goods
Packaging:	Based on specified packaging requirements Moisture protected by wrapping in PE film
Storage period:	2 months maximum at 20 C° and a maximum of 60% humidity in original packaging
